An Engagement that Didn't Stay Broken. The Girl Learned to Appreciate Her Lover Before It Was Too L. Ie, nath all Ends Well.

[ALBANY TELEGRAM.] "Are you writing a novel, dear?" asked Kate Laurence of her friend, Connie Luttrell, who had been bendlug over her writing desk for some

SHORT AND SWEET.

"More unfortunate business," said Connie, with a laugh. 'I am breaking my engagement to Leigh Summers.

"Poor fellow."

"Oh, I havu't seen him for a year, and I dare say he'll be as glad to get off as I am."

"But, you are not in love with anybody else, are you?" hazarded Kate. "No, but every woman has a right to change her mind," said Connie. impatiently.

The letter was posted in time and an answer came, pleasantly acquieseing in Kate's decision.

Strange to say, she felt a moved that Leigh agreed with her so readily. Somehow she felt more worn out than usual when vacation came, so she went to the seashure. Brighton was very gay.

"Summers Leigh is coming to morrow," said an old friend, Colone, Gordon, whom she met on the beach, "How odd," said Kate. "I once knew a Leigh Summers "

"It's quite a romantic history. He has inherited a fortune from a maternal uncle, who, being a Leigh, octurally wished the name to be perpetuated. So he has transformed his own appellation, and a splendid young fellow he is.

"Handsome, polished, full of that ease which springs from natural good breeding. I don't know of man-in the rising generation, that is,-who has impressed me more favorably. Do you not agree with me, Miss Luttrell?" "I-I don't know!" stammered Counie.'

"I can't remember It's ages and iges since I have seen him. We were both children then "

"Ah! indeed!" said the colonel. Things were in leed transposed low. One night, when she was invited to a reception at which Mr.

nie's heart throbbed tunnituously. ' My old liver," she said toherself. 'My disearded suitor! How strange all this has come about! I wonder what he will say when he meets me!" Mr. Leigh met his former flame with the utmost calmness, as it happened

"We are old friends, are we not?" said he. "May I have the honor of your hand for the next dance? It is waltz I believe."

So the piect was over and Connie was angry at herself for faneying it would be different from any other easual introduction.

"Oh, you fool!" she anostrophized herself in the looking glass that night. Oh, you horrid, mean spirited little idiot! I havn't a particle of patience with you. You ought to be shut up in a convent or thrown down a well or something dreadful."

And then, poor girl, she sat down and cried bitterly.

The vacation went by like a happy, fevere I dream. By turns Connie did not know whether she was utterly miserable or unreasonably happy.

She wished herself back a thousand imes at Clayham, and yet whenever she thought of leaving Brighton she was overwhelmed with despair.

"What is to be the end of this?"she hought. Of course he will marry Miss Vandeleur. She is rich and beautiful and exactly suited to be his

But after Leigh had danced one gulop with Miss Vandeleur he crossed the room to where Connie was sitting all pale and drooping.

Mr. Belliel's Pamphlet.

[HARPER'S YOUNG PEOPLE.] There lived, many years ago, in Ireland, a barrister by the name of Bethel, who was rather proud of his attainments, and who liked to show them off in the writing of pamphlets. One of these, said by those who have seen it to be anything but valuable, was upon the subject of the union between Ireland and England.

Meeting a witty aequaintance some days after the publication of his why the wedding eeremony should pamphlet, Bethel was asked by him put an end to the courtship. why he had not intormed him of its Lines Dedlented to the Memory uppearance.

Bethel's turther remarks are not quoted, but it is to be presumed that he turned on his heel and treated his witty friend with silent contempt Through much troubled water, ever afterward.

The Newspapers Get There. [NATIONAL ADVERTISER.]

The statement attributed to John Wanamaker that he considered a oneinch advertisement in a small country newspaper more effective than one hundred thousand circulars recieved remarkable illustration recently when Secretary McDonald, of the Portland, (Me.) Y. M. C. A., stood up at a meeting of the organization and stated that he was curious to know what method of advertising reached the most people. He had circulated several thousand little dodgers giving notice of the meeting, and he requested those who had seen them and been moved to come by that means to rise. The hall was packed with people, and of the entire number only fifteen arose. Then Mr. McDonald asked those who had been attracted by notice in the newspaper to stand up, and the vast majorty of the audience stood upon its feet.

There is more Catarrh in this section of the country than all other diseases pnt together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it Incurable. Bab's Notion of Charity. What is charity? That's what the little interrogation point in my heart asks once in awhile. I look in the Bible and it says: "Charity is kind and suffereth much." I look out on the world, and ask, and it says: "Charity giveth largely to subscriptions and has monuments erected to it," and then I come back home and

And I remember once when an unkind word might have hurt a young girl, and it was left unsald-that was charity.

And I remember that when a word of encouragement would have helped a downcast man, it was given-that was charity.

My friends, charity isn't of necessity the giving of money or the goodness of your own heart and handing over to whomsoever may need it. A heart is funny thing. The more of it you get. That is the reason that kind and lovable and charitable people are called great-hearted. Are you on the list? I hope you are. If you are not then join your hand with mine and see what we can do together, for when the list is presented before the big white throne I want to have written on it in golden letters, the name of Bab.

SAVED FROM A LICKING. Young Hootblack Who Knew How to Be

It is a common saying that a kind word is never lost.

An illustration of the truth occurred one afternoon recently at the corner of Sixteenth and Arapahoe streets. A number of newsboys and bootblacks were gathered there, and in the course of their interchange of compliments and discussion as to the state of business affairs in their little world some little unpleasantness occurred. A boy of more than ordinary size for his age (he could not have been more than fourteen) became involved in an angry discusslon with one of his fellows, a little bootblack about twelve years old, and it looked as though they would

come to blows. Just at this moment Superintendent I. N. Tooke, of the Helping Hand Institute, chanced to be passing. He was attracted by the angry volces and threatening attitude of the young gladiators, who were being urged to blows by their fellows. Stepping in the midst of the crowd, with a gentle hand and a few timely words, he separated the young disputants and at the same time spoke kindly to them about the unmanllness of a large boy striking one smaller and weaker than himself. The boys dispersed and went their several ways.

The next morning, as he was on his way to his office, he spled the little bootblack at the same corner. As he was passing the boy hailed

him, saying:
"Mister, I'd like to black your boots for you. I won't charge you nothin for it. You saved me from a lickin last night, and I'd like to come up to your office every day and black 'em up for you." Mr. Tooke was taken by surprise and questioned the little fellow as to

his home and condition in life. "I ain't got no father or mother. Both dead. I lives with my aunt but she's drunk pretty near all the time, and I've got to hustle for my self. It's pretty hard sometimes too, I tell you. Ain't made much this mornin. Sometimes I gets pretty hungry and nothin to eat; then again I have a food day and eat out o' sight."

The kind hearted superintendent took the youngster to his office and gave him an order for a substantial breakfast, which made the boy's eyes fairly dance, and almost every morning he is met by the young polisher of boots, who never fails to solicit the privilege of putting on a gratui-tous shine.—Denver Republican.

Shall a Woman Tall Her Age? One burden falls to the lot of the single woman which is more keenly felt in society than elsewhere. Trivial and foolish as it may seem, few are aware of its extent and reality, and even the most sensible and suc cessful women are sometimes its victims. Public sentiment, especially in cities and unprovincial towns, has outgrown to a considerable extent the ungallant habit of considering a woman responsible for her age. But there still exist plenty of men and women who have a ready word of scorn or reproach for the unmarried single woman whose youth has

passed.
On account of this sentiment many women are sensitive, and not with out reason, to inquiries about age.

They refrain from allusions which
might lead to the discovery of a secret only, because the curious and rude make such age a matter of ridicule. The only remedy for this discomfort is in the cultivation of a different public sentiment.—Helen M. North in Harper's Bazar.

A conversation between Dr. Mc

Cosh and a friend turned upon theaters and theater going, whose value the learned divine stoutly questioned. His hearer was only partly convinced. "Everything," she insisted, "upon every hand points to the need of amusement." The venerable doctor regarded her quizzically with uplifted eyebrows. 'Ah, but, he argued, 'can you show me where is pointed out the need of amusers?"

The Unknown. A fresh story of alarming adventure in a newly settled country comes from a well known Indian painter. Some years ago he was traveling in Montana. He went to the breakfast table in a mountain hotel and sat waiting for some one

to take his order.
Suddenly he felt a jar and then a heavy weight resting on his shoulders. He looked around and found leaning upon and over him a huge, bearded man, in a broad brinned hat and with two revolvers sticking in his belt.
"Well, old feller, wha'll ye have?" said

"Who are you?" asked the artist in dis-"Me?" said the man. "I'm the waiter." -Youth's Companion.

The Garfield Republican Club gave a banquet at night at their elegant quarters on Sixth Street. On Wednesday at 10:30 the National League met at McCauley's Theater with representatives present from almost every State and Territory in the Union. President and Col. Andrew Cowan introduced Mayor Tylor who extended the delegates the freedom of the city. President I., J. Crawford spoke on the behalf of the State League of Kentucky and Hon. A. E. Willson on behalf of the Louisville League. All the speeches and especially the last one were received with much applause. President Clarkson delivered a ringing address, outlining present political problems and their solution. The League adjourned for the evening races at Churchill Downs and at night met at Pheonix Hill to enjoy the great musical treat and to listen to the speeches of some of the big guns.

The greatest enthusiasm prevailed throuhgout the whole meeting, which adjourned yesterday. It is the most important political gathering held South of the Mason and Dixon line

to criticise the failure to extend invitations to ex-President Harrison and ex-Vice-President Morton to attend the naval review and the World's Fair. It was certainly a very unusual lack of courtesy on the part of those who sent out the invitations. Secretary Herbert is the guilty man, so far as the naval review is concerned; but there seems to be a doubt as to who is to blame for the failure to invite them to the World's Fair. It will be remembered that Mr. Cleveland was invited to attend the dedicatory ceremonies, held at Chicago last

[EXEHANGE.]

The outside world looks with some surprise at the attitude of the present Legislature in regard to the present sehool system of the State. Judge W. M. Beckner, of Winchester, in a communication to the Courier Journal of March 22d; reviews its recent action at length, pointing out its extreme unwise action.

Such a dissection as Judge Beckner gives must open the eyes of honest and intelligent people to the real enemies of this attact on the school sys-

tem of Kentucky. Judge Beckner, than whom there is no abler, truer man in the state, was the avowed, open-handed champion of another candidate for the office of State Superintendent in the Convention, which nominated Hon, Ed Porter Thompson, and in his nominating speech made a most eloquent plea for his favorite, Prof. Hughs, hence his double force, and Judge Beckner speaks his convictions with no uncer-

tain sound. We regret that we connot print the whole of his able plea that Kentucky shall not stultify herself, in taking these steps backward in the face of progress made by all the other States in the Union, in extending and perfecting the school systems. Judge Beckner concludes his able letter as

"Ed Porter Thompson is as honest, earnest, faithful, zealous and broadminded a State Superintendent as Kentucky ever had. He has the courage ol his convictions about every question that he has been called on to consider. He is a common-school man, because from the bottom of his soul he believes in popular education. There is no special ties between us, but I of the best and most accommodating lie is nobly doing his duty as an ofbarbers in the Green River country, ficial. Why the house should seek thus to degrade and weaken his office I cannot imagine, as I have suggested, there is a malign influence which has a mercenary or vindictive motive to Iva Ambrose. A piano tuner tells of finding within the past year mouse nests in four different pianos. The other day he was called into see a piano, the hammers of which struck the strings several times when a key was touched. He knew that this was because something was the matter with the hammer tapes, the purpose of which is to hold the hammers so that they shall strike the strings but once. He found that every one of the 80 odd pieces of tape had disappeared, and the mouse's nest was soon discovered. It was a bunch as large as one's fist, composed of the missing tapes chewed into a pulpy mass. The mice genistines at Frankfort dare not slay the Sampson of popular education, but erally enter a piano by climbing up along the pedal shafts, and almost inthey may have him bound with withes, variably make use of the hammer tapes for their nest.—Exchange. ware, however, because he may at

The Powder of Projection.

The belief in transmutation and in the belief in transmutation and in the virtues of the "powder of projec-tion" is to be found more clearly stated in the works of Zosimus of Panopolis, the earliest known writer on alchemy whose authentic works have come down to us, for in his first lesson he exclaims, "How beautiful it is to see the changes of the four metals—lead, copper, tin, silver—till they become perfect gold!" The idea had evidently been developed and the art assiduously cultivated in Egypt since the time of the spurious Democritus for Zosimus quotes the Democritus, for Zosimus quotes the opinions of many adepts, of whose writings, mostly apochryphal, nothing is known save from his pages.

Hermes Trismegistus and Democritus, Moses and Mary the Jewess, ritus, Moses and Mary the Jewess, Agathodemon and Cleopatra, the prophet Chymes and the "divine" Sophar are quoted as authorities for the operations to be performed on various minerals, which, after being duly melted, calcined, refined and sublimated over and over, are declared to have become gold or silver. clared to have become gold or silver. To these more or less intelligible descriptions of chemical processes Zosinius adds his own commentaries, which he sometimes presents under the form of allegories or visions .-Edinburgh Review.

Narcotic Effects of a California Spring. Superintendent Stout recently described a wonderful mineral spring that formerly flowed from the mountain side some miles above the Butte Creek House and near the Plumas

county line.

This spring was first called to Mr. Stout's attention some years ago while camping in that vicinity by an old prospector, who called it the "chloroform spring." The water which flowed from it did not differ in appearance or taste from the water of other springs, except that it was slightly brackish. It was the effect that followed the drinking of its waters that was remarkable. As mall cup would in the course of half an hour render the drinker totally insensible, and he would remain for hours as if dead. But few white men had ever tried the experiment of drinking from it, but those who have done so describe the effect as not unlike that

resulting from a heavy narcotic.

To the Indians this spring has been known for generations. They call it the "heap sleep" spring, and it is said that more than one weary red man has entered the happy hunting grounds through the medium of its waters.—Oroville Mercury.

Dr. J. M. Warren had been in the habit for a number of years of giving professional advice to a lady in reduced cir-

cumstances, whom he regarded as hardly able to offer him any compensation. At length she ceased consulting him, and he did not see her for a long time. Finally, happening to meet her in the

Long Distance Itldes in Australia. In Australia, where population is sparse and distances are great, some remarkable feats of endurance in horseback riding are credited to the mounted police-feats more remarkable ln some instances, taking into account all the circumstances, than those accomplished by the winners in the military ride between Vlenna and Berlin. Trooper Power, in February, 1880, undertook an arduons journey across most inhospitable country in pursuit of a horse stealer named John Smith. This zealous officer traveled 766 miles in twentysix days without changing horses. For one stage of eighty miles he was wholly without water, and the country was in such a bad state for 130 miles that his two horses had noth-

ing to ent. Hls powers of endurance may be judged from the statement that he did thirty miles a duy on worn out horses, along long, dry stages, and with bad water or no water at all to

occasion, rode eighty-five miles in twenty hours on one horse. This was on May 28, 1887, two days after the natives had "stuck up" Erlduna station. The same man traveled 200 nilles in four days when he heard that a comrade named Shirley had died of thirst. He ilid not have macadamized roads and plenty of fresh water, like the German officers, but he had a broiling sun to endure, sand hills to climb, "mulga" serub to penetrate, and was sometimes compelled to take dead animals out of native wells before he could use the water.
